

Public Notice – Road Work

As part of Anaheim's ongoing efforts to maintain city roadways, the city is placing slurry seal to improve functionality and lengthen the life of the street in front of your home.

Your cooperation will be appreciated during the time necessary for the work to be performed.

1

Step One: On **October 18 & October 19, 2018** street surface is prepared by grinding the streets at the edge of gutters. Temporary **"No Parking"** signs will be posted 48 hours prior to the day of operation. **Access to driveways will be available at all times during this operation.**

2

Step Two: On **October 22 through October 26, 2018**, the Slurry Seal is applied leaving a smooth surface. During this process, **"No Parking and No Driving"** on **affected streets** will be enforced until the contractor removes the traffic control devices and postings from the street. **Be aware that if you drive on a street before slurry has cured you will get asphalt on your vehicle.**

[Please see map on reverse side for more details](#)

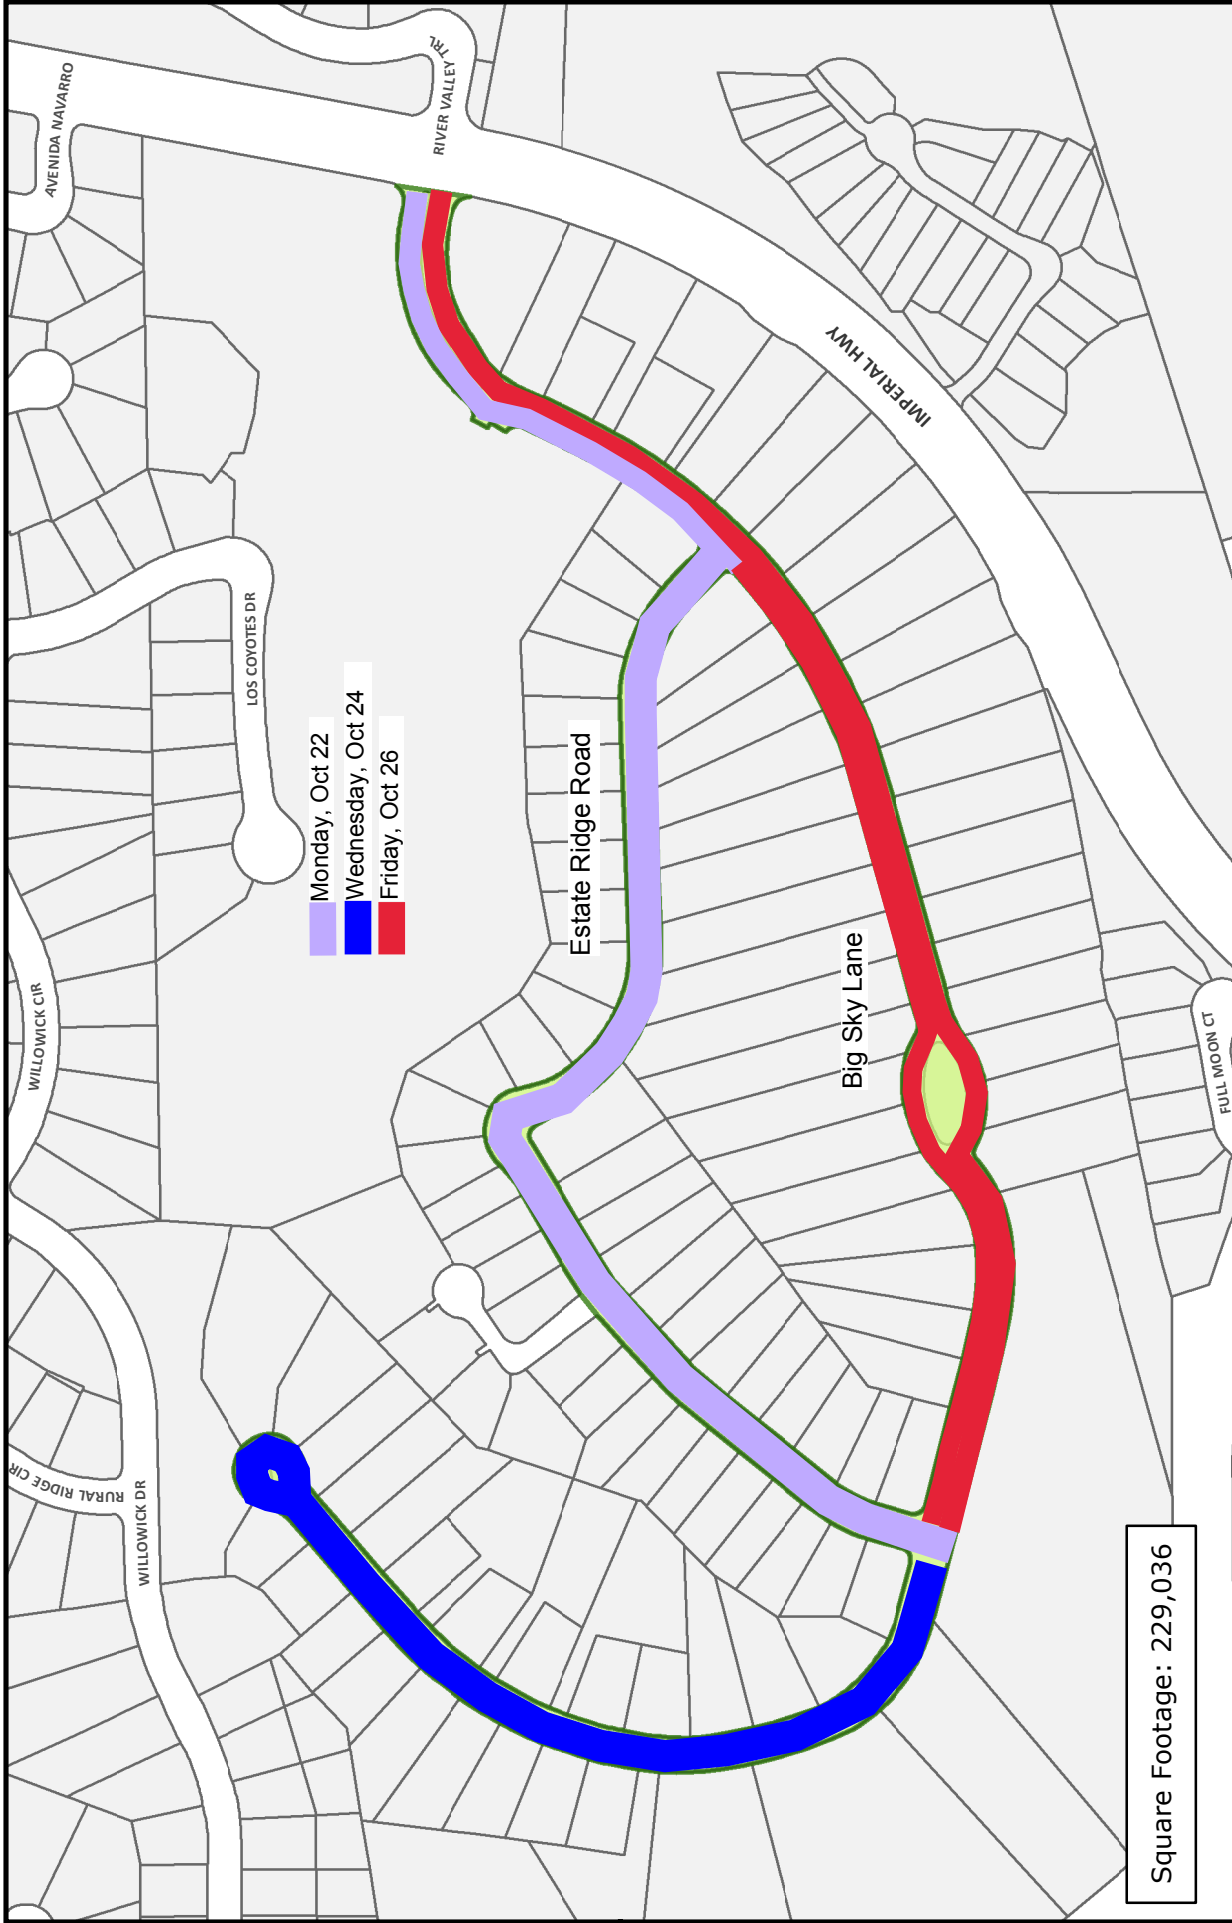

Construction Details:

- Construction activity will generally take place Monday through Friday from 7 am to 5 pm.
- Please keep children and pets away from the street construction.
- Do not run water onto the street the night before or during the application.
- Please adhere to the **"No Parking"** notices.
- To prevent damaging the newly paved street, please avoid steering your vehicle while stopped during the first few weeks after applying the slurry seal.
- **Please contact the City for any questions or special requirements your household may need.**
