

4.2.5 Douglass Road

North of Katella Avenue, Douglass Road will contain four travel lanes and bike lanes. The street landscape will consist of a double row of Mexican Fan Palms in the parkway and setback areas. Bougainvillea (Bougainvillea) will be attached to the base of the palm trunks and yellow and orange Daylilies or a similar low red flowering shrub will be planted at the base of the palm trees. Adjacent to the Honda Center, the median will be a painted median to allow for better traffic flow in and out of the Honda Center and Angel Stadium of Anaheim (Figure 33). North of the Honda Center, the median will be a raised median planted with a single row of green canopy trees and a single species of massed flowering groundcover.

South of Katella Avenue, the streetscape design will be determined as part of the development process for ARTIC.

Bougainvillea
(Bougainvillea)

Orange Daylily
(Hemerocallis flava)

Mexican Fan Palm (*Washingtonia robusta*)
