

FOR YOUR HOME

SmarTimer Irrigation Controller Rebate Program Special Incentive Offer – Limited Time Only

Upgrade your existing, irrigation timer/controller system with a new state-of-the-art “smart” controller that fully automates landscape watering based on the weather and water needs of your plants. **For a limited time only, the original \$20 rebate per valve will be tripled to \$60 per valve.** Participants must meet all program eligibility requirements to qualify for a rebate.

This new technology allows you to:

- Save money by reducing your outdoor water use by up to 25 percent;
- Advance the health and appearance of your landscape;
- Protect the environment by reducing runoff by as much as 45 percent; and
- Set it and forget it – simplify your life by eliminating the need to reset your watering schedule.

Residential rebates will be calculated at \$60 per activated valve. During this special offer, if the rebate amount exceeds the cost of the controller, the amount over the cost of the controller will be applied to the installation cost.

Eligible sites are single-family homes with at least 1,200 square feet of irrigated landscape and working, in-ground irrigation systems with timers.

*The total rebate paid cannot exceed the cost of the clock with installation. One rebate per home.
