

TRAFFIC ALERT

KATELLA SMART STREET IMPROVEMENTS

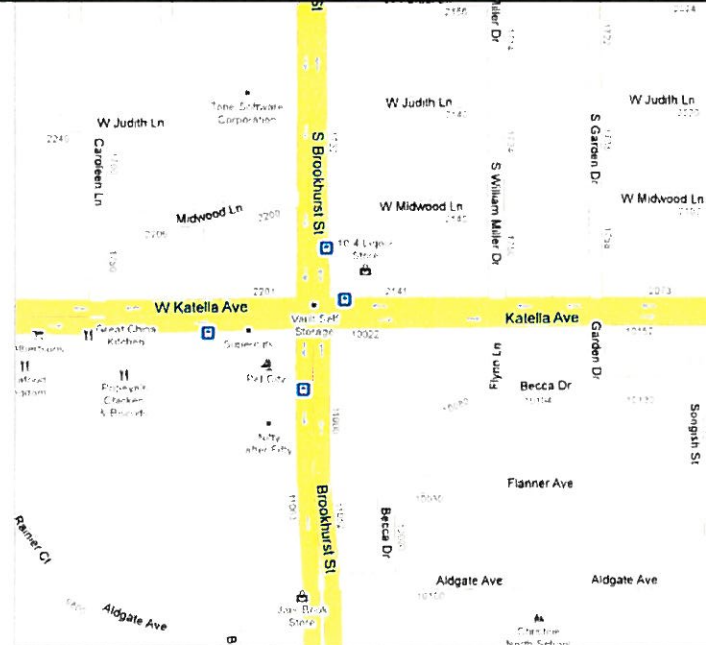

The Katella Smart Street Project between Humor and Jean has begun. This will involve:

- The beautification and widening of Katella Ave
- The installation of a large diameter storm water pipe, which will alleviate flooding in the area
- The replacement of the traffic signals at both Brookhurst and Nutwood to improve traffic flow through the intersections

The project is scheduled for completion in the first quarter of 2011.

Bob Palaeologus at (714) 765-5285

LANE CLOSURES

The 6-foot diameter storm water pipe that will be constructed along the length of the project in Katella Avenue, will tie into the existing storm water pipe in Brookhurst in the center of the Katella/Brookhurst intersection. This tie-in will take 2-3 weeks to complete. During that time, traffic lanes on Katella and Brookhurst will be reduced to a single lane in each direction and no left turns will be permitted at the intersection of Katella/Brookhurst.

Work in the intersection will start on Wednesday 6/9/2010 and continue until 06/25/2010.

We urge you to use alternative routes for the duration of the intersection work.
