SCHEDULE D

DOMESTIC SERVICE

SPECIAL CONDITIONS

A. Lifeline Service

1. Applicability. Lifeline service shall be made available only to domestic service billed on Schedule Nos. DS, DSM and DSMS.
2. Eligibility. All domestic customers on Schedules Nos. DS, DSM and DSMS are entitled to an allocation of a lifeline quantity of electricity which is necessary to supply the minimum energy needs of the average residential user:
 - a. For basic residential use; and
 - b. If qualified, for water heating and space heating; and,
 - c. If qualified, for an essential life-support device used by a full-time resident of a residential household.
3. Basic Residential Use. Each eligible domestic customer will be allowed a lifeline quantity of electricity for lighting, cooking, and food refrigerating, which is specified as basic residential use. The lifeline quantity of electricity for base residential use is set forth on the applicable rate schedules and is to be billed at the rates designated.
4. Water Heating. Each eligible domestic customer may be allowed an additional lifeline quantity of electricity for water heating, upon application to the Utility if electricity is the domestic customer's primary source for water heating. The lifeline quantity of electricity for water heating is set forth on the applicable rate schedule and is to be billed at the rates designated.
5. Space Heating. Each eligible domestic customer may be allowed an additional lifeline quantity of electricity for space heating for service rendered during the months of November through April, inclusive, upon application to the Utility if electricity is the domestic customer's primary source for permanently-installed space heating. The lifeline quantity of electricity for space heating is to be billed at the rates designated.
6. Life-Support Devices in Customer's Residence. Each eligible domestic customer may be allowed an additional lifeline quantity of electricity, upon application to the Utility where such customer provides certification that a full-time resident of the household regularly requires the use of an essential life-support device, such as a respirator, iron lung, or kidney dialysis machine.

SCHEDULE D

DOMESTIC SERVICE

A. Lifeline Service (Continued)

7. Procedure for Certification

The Utility may require that:

- a. The customer have a medical doctor or osteopath licensed to practice medicine in the State of California providing the Utility with a letter, acceptable to the Utility, describing the type of regularly required life-support device and the utilization requirements in detail; or
- b. County, State, or Federal agencies, using an established notification letter to electric utilities, provide the Utility with information relative to patients who regularly require the use of a life-support device in the home.

Upon the above certification, the Utility shall estimate the monthly consumption of the particular life-support device, given the usual hours of operation per month, and within 30 days add the incremental estimated monthly usage to the customer's lifeline quantity. The Utility may require a new or renewed application and/or certification when needed, in the opinion of the Utility.

8. Verification. Not more than one lifeline quantity will be allowed for each single-family dwelling or accommodation on the premises for each of the end uses set forth in Paragraphs 3, 4, 5 and 6 above. However, where there are multiple life-support devices at such single-family dwelling or accommodation, all such certified devices shall be totaled for one lifeline quantity. The number of single-family accommodations on the premises and the existence of the specified end use equipment required to obtain certain lifeline quantities of electricity, as set forth on the applicable rate schedules, are subject to verification by the Utility.

In the event the Utility ascertains that the customer is not eligible for such additional lifeline quantity, such customer may be rebilled as if no such additional lifeline quantity had been allowed.

9. Termination of Use. Customers shall give the Utility notice of termination of use of equipment or devices set forth in Paragraphs 4, 5, and 6 above.
10. Billing. The customer charge and the energy charge shall be billed in the appropriate blocks at the rates designated as applicable to lifeline service up to the total of the applicable lifeline quantities as determined in accordance with Paragraphs 3, 4, 5 and 6 above. Usage in excess of the total applicable lifeline quantities shall be billed in the blocks continuing from the point reached by the total of the applicable lifeline quantities at the rates designated. In addition, all kilowatt-hours sold shall be subject to the Rate Stabilization Adjustment.

B. Multi-Family Accommodations

Where all of the single-family accommodations in an apartment house, court group, or similar multifamily accommodations are on a single meter, the customer shall have the following options:

1. To be billed in General Service Schedules GS-1 or GS-2; or
2. To be billed on the applicable DSM or DSMS rate of this schedule.

C. Rate Stabilization Adjustment

The rates above are subject to adjustment as provided in Schedule RSA. The applicable billing factor set forth therein will be applied to all kilowatt-hours billed under this rate schedule.
