

FOR YOUR BUSINESS

CUSTOMIZED ENERGY INCENTIVES

EARN INCENTIVES AND SAVE ENERGY BY UPGRADING EQUIPMENT

Your current business equipment and process could be eating up profits; newer, energy-efficient equipment could boost your bottom line with increased productivity and lower energy bills. With Anaheim Public Utilities Customized Energy Incentives, we will help you pay for the energy-efficient upgrades. Incentives are based on kW demand or kWh reduced, as well as the measure implemented (see rebate chart below). In addition to cash incentives, the program includes a feasibility study to analyze your equipment and processes and to determine if upgrades could save you money.

HOW THE PROGRAM WORKS

1. Anaheim Public Utilities may perform or elect to fund an on-site study, including an analysis of all major equipment and selected processes, which have a reasonable expectation of yielding significant savings.
2. Following the on-site study, a report will be prepared for you, noting possible energy-efficiency upgrade(s), an energy cost evaluation based on proposed savings, estimated installation costs, incentive amounts and more.
3. Equipment must be purchased within 60 days of approval.
4. Work must be completed within 60 days of starting. Once completed, an Anaheim Public Utilities representative will come to your site to verify the improvements.
5. You'll receive your incentive check within 6 weeks of the post-installation inspection and our receipt of a copy of your paid itemized invoice.

Measures Covered Under Energy Efficiency Incentives	
Motors	See table click here
Feasibility Study	\$15,000 limit
Air Conditioning	\$75 - 300 per ton or See table click here
Other unspecified measures	\$200/kW of reduced demand or \$0.075 per annualized kWh saved

PROGRAM CRITERIA

All participants must be Anaheim Public Utilities commercial, industrial or institutional electric customers. Also, before energy-efficient upgrades are made, a study may be required and approval must be obtained from Anaheim Public Utilities prior to installation to qualify for a rebate. Equipment installations must commence within 60 days of Public Utilities approval and must be completed within the following 60 day period. Finally, an inspection must be conducted of all energy-efficient improvements prior to issuing the incentive check.

PROGRAM ADVANTAGES

By enrolling in this program you will be saving money because we actually provide funds to help you install or upgrade to energy-efficient measures and processes. This will help to reduce your electric use, which in turn will reduce your bill. On average our customers save 10% to 30%. When necessary we may conduct or fund a demand and energy-impact assessment; analyze any potential energy-efficient upgrades and perform a cost analysis. However, please note that feasibility studies are limited to a maximum of \$15,000 per project.

HOW TO SIGN UP

You can sign up for this program using one of two methods. You can call Anaheim Public Utilities at **7714/765-4259** during regular business hours (8 a.m. – 5 p.m. Monday through Friday). Or you can sign up online by [clicking here](#). Please e-mail any questions you may have to elasley@anaheim.net.
