

# FOR YOUR BUSINESS

## Efficient Exit Sign Program

*An easy way to cut energy costs*

One way to reduce your energy costs is to switch your exit signs from incandescent lamps to a more efficient lighting technology such as light emitting diode (LED) bulbs or photoluminescent (glow-in-the-dark) exit signs. These technologies save 90 percent or more over conventional incandescent exit signs. In addition to lower electric bills in the future, you may receive rebates for retrofitting to more efficient exit sign lighting.

### How the Program Works

1. We provide an on-site evaluation of your existing exit lighting signs, including a retrofit evaluation, estimated installation cost and estimated incentive amount. Incentives are 50 percent of the installed cost or \$30 per fixture, whichever is less, up to a maximum of \$10,000 per project.
2. Our representative assists you in completing the necessary documents.
3. Installations must begin within 60 days of approval and be completed within the following 60 days.
4. Once completed, our representative comes to your site to verify the improvements.
5. You will receive your incentive check within 6 weeks of the post-installation inspection and our receipt of a copy of your paid itemized invoice.

### Who can Benefit

Commercial and industrial customers with multiple exit sign lights, including:

- Commercial establishments
- Hospitals
- Office buildings
- Retail establishments
- Schools

### Savings Achieved by Converting to LED Lighting Technology

	5 Exit Signs	50 Exit Signs	100 Exit Signs
Energy Savings On Incandescent Lamps (based on 50 total watts)	\$252/year	\$2,520/year	\$5,040/year
One-time Incentive Amount	\$150	\$1,500	\$3,000
<b>Total Savings</b>	<b>\$402</b>	<b>\$4,020</b>	<b>\$8,040</b>

- Assumptions:
1. 8,740 annual operating hours for old and new exit lighting system.
  2. Two watts to operate LED lighting.
  3. \$0.12 composite kWh cost used for purposes of this illustration; your average energy cost may vary.
