

FOR YOUR HOME

Residential Solar Energy Program

Solar Energy technology converts sunlight into electricity that can be used to power your home. Solar Energy systems are usually mounted on roofs; they are modular, easily expandable, create no noise or pollution and are reliable energy generators. An added benefit to solar energy systems is that they require low maintenance and have long service lives.

Anaheim Public Utilities offers financial incentives for those who install solar energy systems at their home.

How the Program Works

STEP	Here's what you will do	For information, please contact	Forms you will need
1	Reserve your incentive with the City of Anaheim Public Utilities <ul style="list-style-type: none"> You will receive a confirmation letter when your reservation is approved. 	Program Manager 714/765-4182	Reservation Form
2	Design your solar energy system in compliance with Anaheim Public Utilities Interconnection Guidelines <ul style="list-style-type: none"> For meter socket specifications, refer to EUSERC Drawing 300, Section E 	Program Manager 714/765-4182	Interconnection Guidelines Single-Line Diagram
3	Have your solar energy system design approved by Anaheim Public Utilities Electrical Engineering Division at 201 S. Anaheim Blvd. Suite 700 <ul style="list-style-type: none"> 4 copies of design package are required 	Anaheim Public Utilities Electrical Engineering 714/765-4208	Interconnection Application Sample Net Metering Agreement
4	Obtain signature of approval on permit fee waiver form	Program Manager 714/765-4182	Permit Fee Waiver Form
5	Obtain site plan approval from Planning Services	Planning Services 714/765-5139	
6	Obtain permits from the Building Division <ul style="list-style-type: none"> Approval is given over-the-counter 	Building Division 714/765-5153	Building Permit Application
7	Obtain required inspections from the Building Division	Inspection Request Line 714/765-4626	
8	Submit completed application package to receive your funding <ul style="list-style-type: none"> Requires signed copy of application, copy of invoices, warranties and approved field inspection report – include signed Letter of Assignment if incentive is going to supplier 	Program Manager 714/765-4182	Application Form Letter of Assignment

Program Criteria

1. Applicant must be an Anaheim Public Utilities' electric customer with a non-delinquent account;
2. Incentives are for qualifying solar energy systems that do not exceed historical or current electric needs of the customer at the site of installation;
3. System provider/installer with one of the following licenses:
 - a. General Engineering "A" Contractor,
 - b. General Building "B" Contractor
 - c. C-10 Electrical Contractor, or
 - d. or C-46 Solar Contractor;
4. System provider/installer must offer a 10-year warranty against breakdown or degradation in electrical performance of more than 15 percent of the system's rated electrical output, a 10-year or better warranty on modules and 10-year or better warranty on the inverter; and
5. The PV system must be operated in Anaheim for a minimum of three years and penalties apply for early removal of the PV system.
