

+COUNCIL AGENDA REPORT

**City of Anaheim
OFFICE OF THE CITY TREASURER**

DATE: JUNE 18, 2013
FROM: OFFICE OF THE CITY TREASURER
SUBJECT: INVESTMENT PORTFOLIO REPORT – MAY 2013

ATTACHMENT (Y/N): YES ITEM #

RECOMMENDATION:

That the City Council, by Motion, approve the Investment Portfolio Report for May 2013.

DISCUSSION:

This is the investment report for the City’s general pool for the month ending May 31, 2013. The report is provided to ensure that the City Council is informed as to the investment activities and fulfills the reporting requirements of the City’s adopted investment policy.

COMPLIANCE:

All investment transactions were executed in accordance with the California Government Code and the City’s Investment Policy. There is sufficient liquidity to meet the City’s anticipated expenditure requirements for the next six months.

INVESTMENT SUMMARY:

The following table shows summary investment information for the month ending May 31, 2013:

	Short-term Portfolio	Long-term Portfolio	Total Portfolio Values
Portfolio Balance (Market Value) *	\$ 142,296,123	\$ 296,152,869	\$ 438,448,991
Effective Yield	0.16 %	1.41 %	1.00 %
Avg. Weighted Maturity	20 Days	2.7 Years	1.9 Years
Net Earnings	\$ 18,598	\$ 340,663	\$ 359,261
Benchmark**	0.02 %	0.43 %	0.29 %

* Portfolio balance includes approximately \$42.3 million of the 2011A Electric Bond project funds (April 2013)
** Benchmark value is the Interpolated Treasury Yield to the Portfolio’s Avg. Weighted Maturity

INVESTMENT ACTIVITIES

The City Treasurer’s Investment Portfolio has a current rating of “AAf” from Standard and Poor’s (S&P). This rating was effective August 8, 2011, as a result of the action of S&P downgrading the debt issues of the United States Treasury and Federal Agencies from a credit rating of “AAA” to “AA+”. The credit rating reflects the investment holdings of the City’s Investment Portfolio (approximately 53% of funds in Federal Agency issues) and not the management of the investment fund.

It should be pointed out the downgrade in credit rating is the sole action of Standard and Poor’s, since the other two major national credit firms of Moody’s Investor Services and Fitch Ratings have maintained the “AAA” credit rating on all U.S. Treasury and Federal Agency debt issues. Even with the credit downgrade to the investment portfolio, the investment portfolio is still eligible and qualifies as a ‘permitted investment’ for City bond funds (i.e., project or acquisition funds).

This credit rating is for the City’s investment portfolio and does NOT reflect the credit rating of the City’s bond issues.

On August 11, 2008, the City of Anaheim’s Investment Policy was recognized and certified by the Association of Professional Treasurers of the United States and Canada (APT US&C) as meeting all standards and criteria established by the APT US&C.

INVESTMENT ENVIRONMENT

The month of May 2013 showed a “steepening of the yield curve”, with short term interest rates declining and longer term interest rates rising. The primary concern of the financial markets is the Federal Reserve may be nearing the end of their program of purchasing \$80 billion a month of mortgage assets. Called “QE” one, two or three (take your pick) the Federal Reserve action is showing increasing smaller impacts on providing a stimulus to the overall economy. Interest rates have been held at historical levels for several years due to the Fed’s financial policies. Keeping interest rates low has brought about a short-term recovery in the housing markets, but we have not seen significant borrowing and capital investment in the business community. On the contrary, major businesses continue to ‘downsize’ and press for increase productivity gains by using technology at the expense of hiring new employees to meet their revenue and profits. The secondary effect caused by lower interest rates is the lower returns that traditional fixed income investors rely on, from retired individuals to pension funds.

As the chart below indicates, for May 2013, the three month Treasury Bill closed at 0.03%, down from the prior month close of 0.05%. However, the five year Treasury Note closed May 2013 at 1.02%, up over 0.34% from the April 2013 close of 0.68% for a percentage increase of over fifty (50) percent. The benchmark ten year Treasury Note closed May at 2.13%, up from the prior month close of 1.67%. The longer maturity interest rate levels have not been seen since March 2012. It is with apprehension for the investment community that the ‘artificial’ manipulation of interest rates by the Federal Reserve may be coming to an end that is causing the rise in longer term interest rates. The U.S. Treasury debt issues have historically been used as the default yield curve that all other interest rates are compared to.

The chart below shows the interest rates for U.S. Treasury issues for the month ending May 2013:

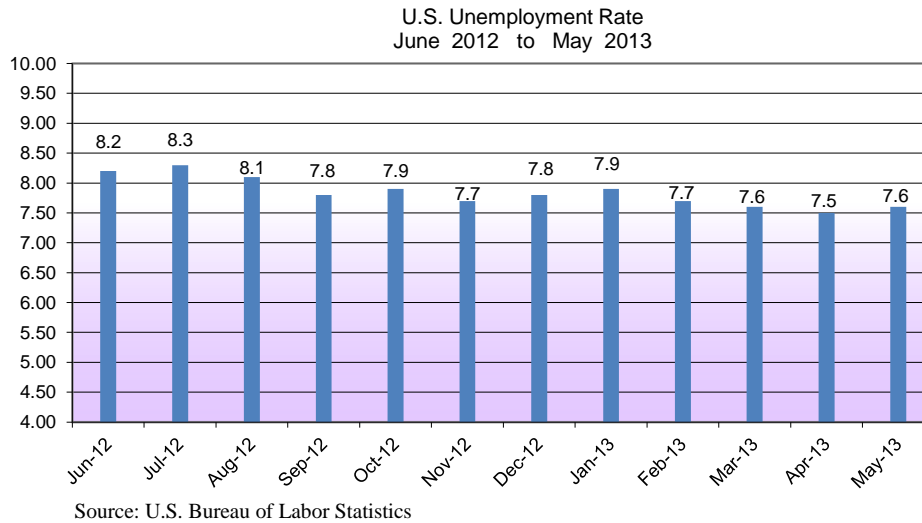

Source: Bloomberg Financial Systems

A key economic indicator watched by investors is the national unemployment rate, which tends to show the overall health of the national economy. For the month of May 2013, the national unemployment rate was reported at 7.6%,

up 1/10 of a percent from the April 2013 value of 7.5% and below the twelve month average of 7.9%. The level has declined significantly from the December 2011 level of 8.5%, however, economists are still forecasting a rate of 7.0% or higher for calendar year 2013.

The unemployment rate is considered a “lagging” economic indicator and does not reflect immediate or current financial and economic events. The unemployment rate does indicate the level of idle workers as a percentage of the overall labor force. The chart below shows the national unemployment rate for the past twelve months:

A more accurate gauge of the employment sector and the improving economy is the amount of jobs being created. The Bureau of Labor Statistics publishes monthly the value of US Employees on nonfarm payrolls, which is an indication of how the corporate or business sector is hiring. For the month of May 2013, the nonfarm payroll number was reported to be 175,000 new jobs created, up from the revised value for April 2013 of 149,000 (revised downward from a previously reported value of 165,000). The annual (twelve month average) value with the revised values shows approximately 176,000 monthly new jobs are being created, which is above the minimum value of 165,000 new monthly jobs that economists have said are needed to show sustained economic growth. It should be noted the nonfarm payroll values are subject to revisions, making an analysis of a distinct trend in this indicator difficult. The chart below shows the nonfarm payroll values for the past two years:

Source: U.S. Bureau of Labor Statistics

Another economic factor we watch is the monthly Retail Sales (less Autos), which measures the level of consumer spending and provides an indication of the underlying vitality of the overall national economy. May 2013 data was not available at the time this report was written, however, the April 2013 value shows an annualized retail sales

value of \$340.4 billion, down slightly from the March 2013 reported level of \$340.8 billion. The small decline shows evidence that the economy is still in a fragile condition and limping along with marginal buying by consumers. It is estimated that consumer spending accounts for nearly seventy percent of economic activity, so a ‘flat’ value indicates slow or incremental recovery. Several factors may be contributing to the absence of strong consumer spending: the ‘sequestered’ action of Congress, since the Government is a large factor in retail sales, the additional social security withholding tax that was increased with January 2013 payrolls, and increasing consumer debt levels. For the past year (May 2012 thru April 2013) retail sales have increased at an annualized rate of 2.2%. The chart below shows the monthly increase in consumer spending for the past twenty four months:

Source: Census Bureau, US Government

INVESTMENT PERFORMANCE/

The City’s investment portfolio remains strongly diversified and invested in high credit quality issues of U.S. Treasuries, Federal Agencies, Medium Term Corporate Notes and high grade commercial paper. Investments in money market accounts are restricted to U.S. Treasury and Federal Agencies only and a review of the State of California Local Agency Investment Fund (LAIF) shows high levels of liquidity and safe investments. The City’s investment strategy continues to focus on safety and providing liquidity for the City’s operational requirements.

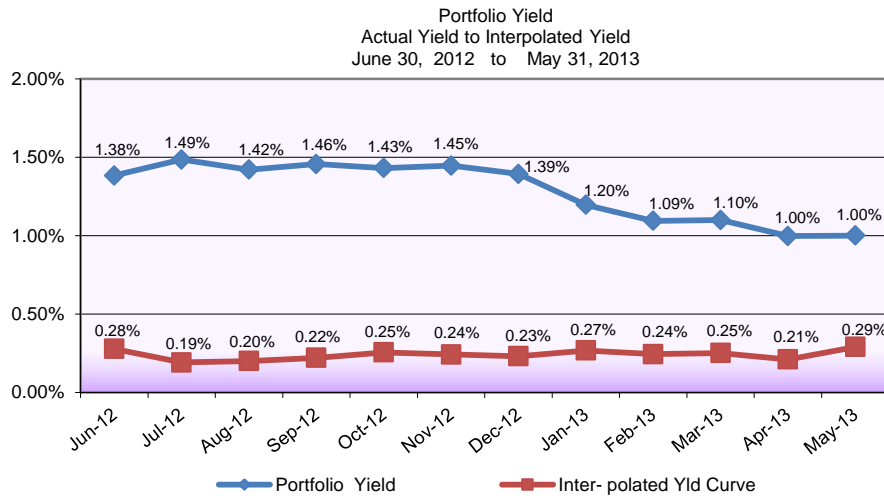

For May 31, 2013, the City Treasurer’s Investment Portfolio performance was:

	Amount of Funds (Market Value)	Maturity	Effective Yield	Interpolated Yield	Total Return Monthly	Total Return Annual
Short-Term Portfolio	\$ 142,296,123	20 days	0.16 %	0.02 %	0.013	0.228
Long-Term Portfolio	\$ 296,152,869	2.7 years	1.41 %	0.43 %	-0.346	1.135
Total Portfolio	\$ 438,448,991	1.9 years	1.00 %	0.29 %	-0.224	0.854

The portfolio balance includes a deposit for the acquisition funds of the 2011A Electric Bonds of \$42,310,011 as of the April 30, 2013 bond fund report balance. As a credit rated portfolio of “AA”, we are recognized as a permitted investment by the bond indenture of the above bonds. These funds enjoy the advantage of superior market rates of return in a historically low interest rate environment.

Please note the use of interpolated yield values and total return values are guidelines and not used in the performance evaluation of the portfolio. The investment of public funds is exposed to a large range of variable factors, such as increases or decreases in revenues and expenditures as well as seasonal timing, which can affect the cash flow of the City.

The City's investment portfolio continues to provide above market rates of return on funds invested as shown in the following graph which shows the City's net overall performance to a market indicator for the past twelve months:

Source: Treasurer's Office, Anaheim

A complete listing of the portfolio holdings and investment activity for the City of Anaheim's Investment Portfolio for the month of May 2013 is on the following pages.

IMPACT ON BUDGET:

There is no impact on the General Fund.

Respectfully submitted,

Henry W. Stern, CTP
City Treasurer

POOL PROFILE

September 28, 2012

City of Anaheim Treasurer Investment Pool

Fund Credit Quality Ratings Definitions

AAAF The fund's portfolio holdings provide extremely strong protection against losses from credit defaults.

AAF The fund's portfolio holdings provide very strong protection against losses from credit defaults.

Af The fund's portfolio holdings provide strong protection against losses from credit defaults.

BBBf The fund's portfolio holdings provide adequate protection against losses from credit defaults.

BBf The fund's portfolio holdings provide uncertain protection against losses from credit defaults.

Bf The fund's portfolio holdings exhibit vulnerability to losses from credit defaults.

CCCf The fund's portfolio holdings make it extremely vulnerable to losses from credit defaults.

Plus (+) or Minus (-) The ratings from 'AAf' to 'CCCf' may be modified to show relative standing within the major rating categories.

Fund Credit quality ratings, identified by the 'f' subscript, are assigned to bond funds and other actively managed funds that exhibit variable net asset values. These ratings are current assessments of the overall credit quality of a fund's portfolio. The ratings reflect the level of protection against losses from credit defaults and are based on an analysis of the credit quality of the portfolio investments and the likelihood of counterparty defaults.

*As assessed by Standard & Poor's

Pool Highlights

- The City of Anaheim Treasurer Investment Pool holds securities that have an average maturity of two years or less.
- The pool must purchase securities with a rating of 'A' or better.

Management

The treasurer for the city of Anaheim, California, is responsible for overall management of the portfolio. The treasurer has prior experience managing Standard & Poor's-rated government investment pools from his tenure at the cities of Los Angeles and Long Beach. The City of Anaheim's \$300 million-plus portfolio is divided into a short-term and a long-term portfolio; \$95 million to \$120 million comprises the short-term component. The investment policy is reviewed and submitted to the city council annually—with the current 2012 policy in effect—and applies to all cash and investments controlled by the Anaheim treasurer on behalf of the city.

Credit Quality

Standard & Poor's rates City of Anaheim Treasurer Investment Pool 'AAf/S1'. The 'AAf' fund credit quality rating is based on Standard & Poor's analysis of the credit quality of the portfolio's eligible investments, the counterparties, and the overall management by the portfolio's investment managers. The 'AAf' rating demonstrates that the fund's portfolio holdings provide very strong protection against losses from credit defaults. The 'S1' volatility rating indicates that the pool possesses low sensitivity to changing market conditions and an aggregate level of risk that is less than or equal to that of a portfolio comprised of government securities maturing within one to three years and denominated in the base currency of the pool. As part of Standard & Poor's volatility

analysis, it assessed the management, portfolio-level risk, target durations, and comparable return strategies of the portfolio.

Portfolio Assets

Eligible portfolio holdings are typically comprised of highly-rated securities, including money-market funds, investment-grade corporate debt, commercial paper, the Local Agency Investment Fund (LAIF), and U.S. Treasury and agency securities. The pool can only purchase securities with a rating of 'A' or better. The pool's primary objectives are to provide safety of principal, followed by maintenance of liquidity and return on investment. Various city departments are the pool's predominant investors. The short-term portfolio's benchmark is the 91-Day Treasury bill, which is managed with the view that cash is needed for operating purposes within a six-month period. The long-term portfolio's benchmark is the Merrill Lynch 1-3 Year U.S. Treasury Index. The pool's overall duration is currently 1.5 years, with a maximum duration of three years. Union Bank of California is the custodian for the pool.
