

+COUNCIL AGENDA REPORT

City of Anaheim OFFICE OF THE CITY TREASURER

DATE: NOVEMBER 16, 2010
FROM: OFFICE OF THE CITY TREASURER
SUBJECT: INVESTMENT PORTFOLIO REPORT – OCTOBER 2010

ATTACHMENT (Y/N): YES **ITEM #**

RECOMMENDATION:

That the City Council, by Motion, approve the Investment Portfolio Report for October 2010.

DISCUSSION:

This is the investment report for the City's general pool for the month ending October 31, 2010. The report is provided to ensure that the City Council is informed as to the investment activities and fulfills the reporting requirements of the City's adopted investment policy.

COMPLIANCE:

All investment transactions were executed in accordance with the California Government Code and the City's Investment Policy. There is sufficient liquidity to meet the City's anticipated expenditure requirements for the next six months.

INVESTMENT SUMMARY:

The following table shows summary investment information for the month ending October 31, 2010:

	Short-term Portfolio	Long-term Portfolio	Total Portfolio Values
Portfolio Balance (Market Value)	\$ 100,978,349	\$ 219,241,780	\$ 320,220,129
Effective Yield	0.37 %	2.65 %	1.92 %
Avg. Weighted Maturity	1 Days	2.1 Years	1.4 Years
Net Earnings	\$ 30,158	\$ 494,505	\$ 524,663
Benchmark*	0.13 %	0.31 %	0.25 %

* Benchmark value is the Interpolated Treasury Yield to the Portfolio's Avg. Weighted Maturity

INVESTMENT ACTIVITIES

The City Treasurer's Investment Portfolio received a credit rating of AAf and a volatility rating of S1 from Standard and Poor's in July 2008. The portfolio is reviewed monthly by Standard and Poor's for portfolio holdings, liquidity values and the overall management of the investment staff. Standard and Poor's reaffirmed the City's AAf credit rating during their annual June 2010 due diligence review. The City of Anaheim is only the fourth City in the country at this time to receive the prestigious credit rating.

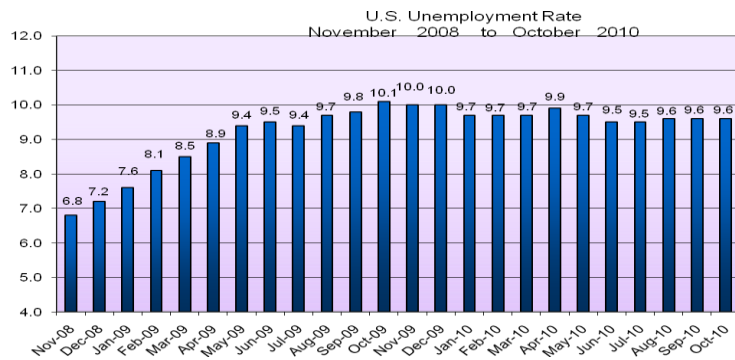

In addition to independent verification of the high standard for the City’s investment program, the AAaf credit rating is recognized by leading bond insurer's as a highly safe investment option for future City bond issues and to include the City’s portfolio as a ‘permitted investment’ in the bond covenants.

On August 11, 2008, the City of Anaheim’s Investment Policy was recognized and certified by the Association of Professional Treasurers of the United States and Canada (APT US&C) as meeting all standards and criteria established by the APT US&C.

INVESTMENT ENVIRONMENT

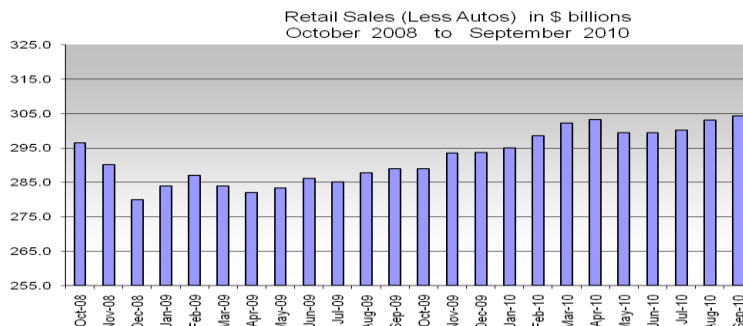

The economy continues to show signs of a slow recovery from the recession of 2008-2009. There is concern the lack of economic growth is beginning to develop an economic malaise that may continue the slow growth for years to come. This condition has created discussions of another stimulus package from Washington to sustain the modest growth and to jump start the economy. One economist has referred the current recovery as “the square root” recovery, meaning the graph shows a definitive drop, then a significant short term recovery, followed by a long gradual increasing growth line, similar to the shape of the square root sign in mathematics.

A closely watched economic indicator is the national unemployment rate. Since May 2009, the national unemployment rate has remained above 9.4 percent, reaching a high of 10.1 % in October 2009 and showing 9.6 % for October 2010. This indicator is considered a “lagging” economic indicator and does not immediately reflect any improvement in economic conditions. It appears unemployment will continue to stay at current levels through the remainder of calendar year 2010 as other economic sectors of the economy continue to show mixed results. The chart below shows the national unemployment rate for the past twenty four months:

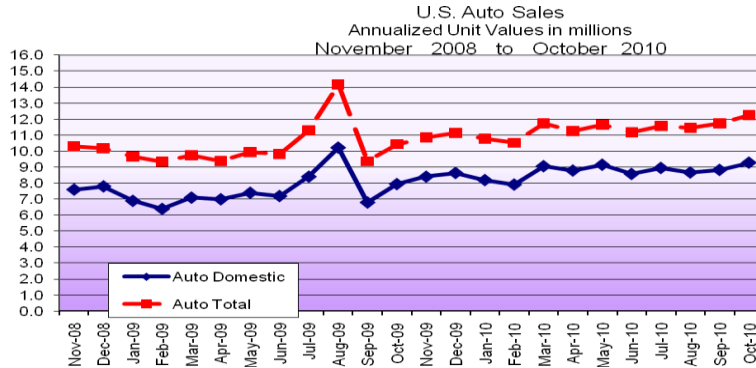

Source: Bureau of Statistics, Dept of Labor

A key economic factor we review is the monthly Retail Sales (less Autos), which measures the spending of consumers and indicates the underlying vitality of the overall national economy. This economic indicator tends to be cyclic, improving during traditional sales periods, such as the holidays, and slowing during non-holiday periods. The slow increase in overall sales by the consumer supports the view point of a “square root” recovery. The chart below shows that from October 2008 through September 2010, the level of consumer spending has shown a steady increase to support the economic recovery:

Source: Census Bureau, US Government

Another set of economic data we look at is the level of Auto Sales as an indicator of consumer buying sentiment, particularly the consumer sentiment toward large dollar purchases. For the past twenty four months, auto sales have shown flat to slow growth, with the exception of the “cash for clunkers” program in August 2009, which caused a temporary “spike” in auto sales. Since that time, auto sales have remained somewhat steady at 9 million units for domestic sales and 11 to 12 million annualized units for total auto sales. The chart below shows the monthly annualized auto sales for the past twenty four months:

Source: Bloomberg Financial System

Interest rates for October 2010 drifted lower to historic low levels. There are concerns that the economic recovery is showing signs of stalling or moving at a slower pace than desired which could be interpreted as “malaise”. The Federal Reserve announced at the November 3, 2010 ‘Federal Open Market Committee (FOMC) meeting their intention to purchase over \$600 billion of fixed income securities in a move to assist in the economic recovery. This action had an immediate effect on moving interest rates lower. In addition, the Federal Reserve continued to reaffirm the benchmark overnight Federal Funds rate at the range of 0.0% to 0.25%, citing continued “risk to growth” to the economy. This key market interest rate has remained at this level since the FOMC meeting on December 16, 2008. The Federal Funds interest rate is the interest rate that banks charge other banks to borrow money.

The Federal Reserve has continued to indicate that with the slow economic recovery and absence of evidence of sustainability, their posture is to hold short term interest rates at current levels for the foreseeable future. A majority of economists and market participants do not anticipate an increase in interest rates until the second half of calendar year 2011.

The City’s short-term portfolio ended October 2010 earning 0.37%, as compared to the three month U.S. Treasury bill yield of 0.13%. The longer term portfolio’s yield was 2.65%, which exceeded the interpolated yield of 0.31% for the month of October 2010. We do not anticipate any material rise in interest rates until either inflationary pressures increase or the Federal Reserve changes its current strategy. The chart below shows the interest rates for U. S. Treasury issues for the month ending October 2010:

Source: Bloomberg Financial Systems

The City’s investment portfolio remains strongly diversified and invested in high credit quality issues of U.S. Treasuries, Federal Agencies, Medium Term Corporate Notes and high grade commercial paper. Investments in money market accounts are restricted to U.S. Treasury and Federal Agencies only and a review of the State of California Local Agency Investment Fund (LAIF) shows high levels of liquidity and safe investments. The City’s investment strategy continues to focus on safety and providing liquidity for the City’s operational requirements.

INVESTMENT PERFORMANCE

For October 2010, the City Treasurer’s Investment Portfolio performance was:

	Amount of Funds (Market Value)	Maturity	Effective Yield	Interpolated Yield	Total Return Monthly	Total Return Annual
Short-Term Portfolio	\$ 100,978,349	1 days	0.37 %	0.13 %	0.032	0.459
Long-Term Portfolio	\$ 219,241,780	2.1 years	2.65 %	0.31 %	0.320	3.986
Total Portfolio	\$ 320,220,129	1.4 years	1.92%	0.25 %	0.233	3.329

Please note the use of interpolated yield values and total return values are guidelines and not used in the performance evaluation of the portfolio. The investment of public funds is exposed to a large range of variable factors, such as increases or decreases in revenues and expenditures as well as seasonal timing, which can affect the cash flow of the City.

The City’s investment portfolio continues to provide a market rate of return on funds as shown in the following graph which shows the City’s net overall performance to a market indicator for the past twelve months:

Source: Treasurer’s Office, Anaheim

A complete listing of the portfolio holdings and investment activity for the City of Anaheim’s Investment Portfolio for the month of October 2010 is on the following pages.

IMPACT ON BUDGET:

None.

Respectfully submitted,

Henry W. Stern, CTP
 City Treasurer

FUND PROFILE

March 31, 2010

City of Anaheim Treasurer Investment Pool

Credit Quality Ratings Definitions

AAAF The fund's portfolio holdings provide extremely strong protection against losses from credit defaults.

AAf The fund's portfolio holdings provide very strong protection against losses from credit defaults.

Af The fund's portfolio holdings provide strong protection against losses from credit defaults.

BBBf The fund's portfolio holdings provide adequate protection against losses from credit defaults.

BBf The fund's portfolio holdings provide uncertain protection against losses from credit defaults.

Bf The fund's portfolio holdings exhibit vulnerability to losses from credit defaults.

CCCf The fund's portfolio holdings make it extremely vulnerable to losses from credit defaults.

Plus (+) or Minus (-) The ratings from 'AAf' to 'CCCf' may be modified to show relative standing within the major rating categories.

Credit quality ratings, identified by the 'f' subscript, are assigned to bond funds and other actively managed funds that exhibit variable net asset values. These ratings are current assessments of the overall credit quality of a fund's portfolio. The ratings reflect the level of protection against losses from credit defaults and are based on an analysis of the credit quality of the portfolio investments and the likelihood of counterparty defaults.

About the Fund

Fund Rating: **AAAf / S1**
 Fund Type: Variable NAV Government Investment Pool
 Investment Adviser: City of Anaheim CA
 Portfolio Manager: Henry Stern, CTP
 Fund Rated Since: July 2008

Portfolio Composition as of March 31, 2010

AGCY - Agency Fixed Rate; DCP - Commercial Paper; MMF - Money Market Fund; BOND - Corporate Fixed Rate

*As assessed by Standard & Poor's

Fund Highlights

- Average maturity 2 years or less
- The portfolio must purchase securities with a rating of A or better

Management

The Treasurer for the city of Anaheim, CA is responsible for overall management of the portfolio. The Treasurer has prior experience managing S&P rated government investment pools during his tenure at the cities of Los Angeles and Long Beach. The city of Anaheim's \$400+ million portfolio is being divided into a shorter-term and a longer term portion, where \$100-\$125 million comprises the shorter-term component. The investment policy, which was last revised and approved in January 2009, apply to all cash and investments controlled by the Anaheim Treasurer on behalf of the City.

Credit Quality

The 'AAAf' fund credit quality rating is based on our analysis of the credit quality of the Portfolio's eligible investments, the counterparties, and overall management by the portfolio's investment managers. The 'AAAf' rating signifies that the portfolio holdings provide extremely strong protection against losses from credit defaults. The 'S1' volatility rating signifies that a fund possesses low sensitivity to changing market conditions and a level of risk that is less than or equal to that of a portfolio comprised of the highest quality fixed-income instruments with an average maturity of one to three years. As part of our volatility analysis, we assessed the management, portfolio-level risk, target durations, and comparable return strategies of the Portfolio.

Portfolio Assets

Eligible portfolio holdings are typically comprised of highly rated securities, including money-market

funds, investment-grade corporate debt, CP, the Local Agency Investment Fund (LAIF), U.S. Treasury and Agency securities. The portfolio has to purchase securities with a rating of A or better. The Anaheim Treasurer's Investment Pool's primary objective is to provide safety of principal followed by maintenance of liquidity and return on investment. The various city departments are the Investment Pool's predominant investors. The short-term portfolio's benchmark is the ninety-one day T-bill and it is managed with the view that cash is needed for operating purposes within a 6-month period. The long-term portfolio uses the ML 1-3 Year US Treasury benchmark. The Investment Pool's overall duration is currently 1.8 years with a maximum duration of 3 years. Union Bank of CA is the custodian for the pool.

Standard & Poor's Analyst: Guyna Johnson - (1) 312-233-7008
