

It should be pointed out the downgrade in credit rating is the sole action of Standard and Poor’s, since the other two major national credit firms of Moody’s Investor Services and Fitch Ratings have maintained the “AAA” credit rating on all U.S. Treasury and Federal Agency debt issues. Even with the credit downgrade to the investment portfolio, the investment portfolio is still eligible and qualifies as a ‘permitted investment’ for City bond funds (i.e., project or acquisition funds).

This credit rating is for the City’s investment portfolio and does NOT reflect the credit rating of the City’s bond issues.

On August 11, 2008, the City of Anaheim’s Investment Policy was recognized and certified by the Association of Professional Treasurers of the United States and Canada (APT US&C) as meeting all standards and criteria established by the APT US&C.

INVESTMENT ENVIRONMENT

The month of January 2013 started the New Year off with no change in interest rates under two years and an increase in longer term interest rates due to a robust stock market and signs that the European debt issues are being addressed. Also, the “fiscal cliff” soap opera we have heard for the past four months has been “kicked” down the road or calendar to later in 2013, giving everyone a sense of relief, albeit short-term. The three month U.S. Treasury bill closed January 2013 at 0.07%, up from the December 2012 close of 0.04%, however, the six month U.S. Treasury Bill was unchanged from the prior month closing January 2013 at 0.11%. Where the interest rates start to show a raise is the three year U.S. Treasury Notes, which closed January at 0.40%, up 0.05% from the December close of 0.35%. Correspondingly, the five year U.S Treasury Note closed January at 0.88%, up 0.16% from December’s close of 0.72% and the benchmark ten year U.S. Treasury Notes moved above 2.00% briefly before closing at 1.99%, up 0.23% from the prior month’s close. The chart below shows the interest rates for U.S. Treasury issues for the month ending January 2013:

Source: Bloomberg Financial Systems

The Federal Reserve continues to maintain the benchmark “Federal Funds” rate in the established range of 0.00% to 0.25% with the explanation of “risk to growth”. The Fed Funds rate has been at this rate for over four years, since the Federal Open Market Committee (FOMC) took action at their December 2008 meeting. The FOMC meeting of January 30, 2013 continued its low rate policy action. There is no indication that at the next FOMC meeting scheduled for March 30, 2013 that there will be a change in policy. Federal Reserve Chairman Bernanke has voiced his concern for the slow growth of new job creation in the economy and has indicated he is prepared to advance additional stimulus, which the financial markets are calling “qualitative easing” or QE 3. Mr. Bernanke has also stated he intends to keep rates at these levels through the end of calendar year 2014 and even into 2015.

The U.S. economy continues to show slow incremental growth. One economic indicator watched by a large group of investors is the national unemployment rate, which tends to show the overall health of the national economy. For the month of January 2013, the national unemployment rate was reported at 7.9%, up 1/10 of a percent from the December 2012 value of 7.8% and below the twelve month average of 8.1%. The level has declined significantly from the December 2011 level of 8.5%, however, economists are still forecasting the rate at 7.0% or higher for calendar year 2013.

The unemployment rate is considered a “lagging” economic indicator and does not reflect immediate or current financial and economic events. The unemployment rate does indicate the level of idle workers as a percentage of the overall labor force. The chart below shows the national unemployment rate for the past twelve months:

Source: Bureau of Statistics, Dept of Labor

A more accurate gauge of the employment sector and the improving economy is the amount of jobs being created. The Bureau of Labor Statistics publishes monthly the value of US Employees on nonfarm payrolls, which is an indication of how the corporate or business sector is hiring. For the month of January 2013, the nonfarm payroll number was reported to be 157,000 new jobs created, down from the revised value for the December 2012 of 196,000 (revised upward from a previously reported value of 155,000). The annual (twelve month average) value with the revised values shows approximately 168,000 monthly new jobs are being created, which is slightly above the minimum value of 160,000 new monthly jobs that economists have said are needed to show significant economic growth. The chart below shows the nonfarm payroll values for the past two years:

Source: U.S. Bureau of Labor Statistics

Another economic factor we watch is the monthly Retail Sales (less Autos), which measures the level of consumer spending and provides an indication of the underlying vitality of the overall national economy. The January 2013 value was not available at the time this report was written, however, the December 2012 retail sales data showed annualized retail sales less autos to be \$337.6 billion or 0.3% higher than November 2012 value of \$336.7 billion. The small increase in sales could reflect the combination of the ongoing uncertainty in Congress on tax issues, the recent Super Storm Sandy hurricane that affected much of the eastern seaboard and the consumer scramble to acquire some transportation (cars) that were destroyed by the storm. The chart below shows the monthly increase in consumer spending for the past twenty four months:

Supporting the slow trend in retail sales, we see the annualized rate of auto sales showing an annualized value at approximately 14 to 15 million units. This economic statistic is cyclical and driven by a combination of consumer confidence, the price of gasoline and the overall health of the economy. The chart below shows the monthly annualized auto sales for the past twenty four months:

INVESTMENT PERFORMANCE/

The City’s investment portfolio remains strongly diversified and invested in high credit quality issues of U.S. Treasuries, Federal Agencies, Medium Term Corporate Notes and high grade commercial paper. Investments in money market accounts are restricted to U.S. Treasury and Federal Agencies only and a review of the State of California Local Agency Investment Fund (LAIF) shows high levels of liquidity and safe investments. The City’s investment strategy continues to focus on safety and providing liquidity for the City’s operational requirements.

For January 31, 2013, the City Treasurer’s Investment Portfolio performance was:

	Amount of Funds (Market Value)	Maturity	Effective Yield	Interpolated Yield	Total Return Monthly	Total Return Annual
Short-Term Portfolio	\$ 105,033,350	24 days	0.17 %	0.03 %	0.015	0.277
Long-Term Portfolio	\$ 291,834,246	2.8 years	1.57 %	0.37 %	0.051	1.366
Total Portfolio	\$ 396,867,596	2.1 years	1.20 %	0.27 %	0.041	1.120

The portfolio balance includes a deposit for the acquisition funds of the 2011A Electric Bonds of \$54,756,256 as of the December 31, 2012 bond fund report balance. As a “AA” credit rated portfolio, we are recognized as a

permitted investment by the bond indenture of the above bonds. These funds enjoy the advantage of superior market rates of return in a historically low interest rate environment.

Please note the use of interpolated yield values and total return values are guidelines and not used in the performance evaluation of the portfolio. The investment of public funds is exposed to a large range of variable factors, such as increases or decreases in revenues and expenditures as well as seasonal timing, which can affect the cash flow of the City.

The City's investment portfolio continues to provide above market rates of return on funds invested as shown in the following graph which shows the City's net overall performance to a market indicator for the past twelve months:

A complete listing of the portfolio holdings and investment activity for the City of Anaheim's Investment Portfolio for the month of January 2013 is on the following pages.

IMPACT ON BUDGET:

There is no impact on the General Fund.

Respectfully submitted,

Henry W. Stern, CTP
 City Treasurer

City of Anaheim Treasurer Investment Pool

Fund Credit Quality Ratings Definitions

AAAF The fund's portfolio holdings provide extremely strong protection against losses from credit defaults.

AAF The fund's portfolio holdings provide very strong protection against losses from credit defaults.

Af The fund's portfolio holdings provide strong protection against losses from credit defaults.

BBBf The fund's portfolio holdings provide adequate protection against losses from credit defaults.

BBf The fund's portfolio holdings provide uncertain protection against losses from credit defaults.

Bf The fund's portfolio holdings exhibit vulnerability to losses from credit defaults.

CCCf The fund's portfolio holdings make it extremely vulnerable to losses from credit defaults.

Plus (+) or Minus (-) The ratings from 'AAf' to 'CCCf' may be modified to show relative standing within the major rating categories.

Fund Credit quality ratings, identified by the 'f' subscript, are assigned to bond funds and other actively managed funds that exhibit variable net asset values. These ratings are current assessments of the overall credit quality of a fund's portfolio. The ratings reflect the level of protection against losses from credit defaults and are based on an analysis of the credit quality of the portfolio investments and the likelihood of counterparty defaults.

About the Pool

*As assessed by Standard & Poor's

Pool Highlights

- The City of Anaheim Treasurer Investment Pool holds securities that have an average maturity of two years or less.
- The pool must purchase securities with a rating of 'A' or better.

Management

The treasurer for the city of Anaheim, California, is responsible for overall management of the portfolio. The treasurer has prior experience managing Standard & Poor's-rated government investment pools from his tenure at the cities of Los Angeles and Long Beach. The City of Anaheim's \$300 million-plus portfolio is divided into a short-term and a long-term portfolio; \$95 million to \$120 million comprises the short-term component. The investment policy is reviewed and submitted to the city council annually—with the current 2012 policy in effect—and applies to all cash and investments controlled by the Anaheim treasurer on behalf of the city.

Credit Quality

Standard & Poor's rates City of Anaheim Treasurer Investment Pool 'AAf/S1'. The 'AAf' fund credit quality rating is based on Standard & Poor's analysis of the credit quality of the portfolio's eligible investments, the counterparties, and the overall management by the portfolio's investment managers. The 'AAf' rating demonstrates that the fund's portfolio holdings provide very strong protection against losses from credit defaults. The 'S1' volatility rating indicates that the pool possesses low sensitivity to changing market conditions and an aggregate level of risk that is less than or equal to that of a portfolio comprised of government securities maturing within one to three years and denominated in the base currency of the pool. As part of Standard & Poor's volatility

analysis, it assessed the management, portfolio-level risk, target durations, and comparable return strategies of the portfolio.

Portfolio Assets

Eligible portfolio holdings are typically comprised of highly-rated securities, including money-market funds, investment-grade corporate debt, commercial paper, the Local Agency Investment Fund (LAIF), and U.S. Treasury and agency securities. The pool can only purchase securities with a rating of 'A' or better. The pool's primary objectives are to provide safety of principal, followed by maintenance of liquidity and return on investment. Various city departments are the pool's predominant investors. The short-term portfolio's benchmark is the 91-Day Treasury bill, which is managed with the view that cash is needed for operating purposes within a six-month period. The long-term portfolio's benchmark is the Merrill Lynch 1-3 Year U.S. Treasury Index. The pool's overall duration is currently 1.5 years, with a maximum duration of three years. Union Bank of California is the custodian for the pool.
