

It should be pointed out the downgrade in credit rating is the sole action of Standard and Poor’s, since the other two major national credit firms of Moody’s Investor Services and Fitch Ratings have maintained the “AAA” credit rating on all U.S. Treasury and Federal Agency debt issues. Even with the credit downgrade to the investment portfolio, the investment portfolio is still eligible and qualifies as a ‘permitted investment’ for City bond funds (i.e., project or acquisition funds).

This credit rating is for the City’s investment portfolio and does NOT reflect the credit rating of the City’s bond issues.

On August 11, 2008, the City of Anaheim’s Investment Policy was recognized and certified by the Association of Professional Treasurers of the United States and Canada (APT US&C) as meeting all standards and criteria established by the APT US&C.

INVESTMENT ENVIRONMENT

The month of June 2012 showed a decline in interest rates as the financial issues in Europe and concern over the slowing of the global economies continued to be watched by the investment community. Spain has agreed to stringent austerity provisions by the European Monetary Fund (EMF) and Greece is struggling to adopt their austerity program. The international embargo to Iran takes effect July 1, 2012, which is adding caution to world markets as regards to access to Middle East oil shipments. The U.S. Navy has maintained a strong presence in the region to ensure free access for the shipping lanes of the petroleum producers. Excluding the immediate financial crises, the entire European union appears to be entering a period of recessionary economic activity, which could impact the revenues of United States multi-national corporations, since the European market accounts for nearly 25 percent of U.S. sales and exports.

This uncertainty in the financial markets has kept interest rates at near historically record lows. The three month U.S. Treasury bill closed the month of June 2012 at 0.08%, the two year U.S. Treasury Note closed at 0.30% and the ten year U.S. Treasury Note closed the month at 1.65%. The primary reason for lower interest rates is the investment community seeking a “safe haven” for investment funds or called a “flight to quality” as U.S. financial securities still appear to be the international investor’s investment security of choice.

The Federal Reserve continues to maintain the benchmark “Federal Funds” rate in the established range of 0.00% to 0.25%. The Fed Funds rate has been at this rate for nearly three and a half years, since the Federal Open Market Committee (FOMC) took action at their December 2008 meeting. The FOMC meeting of June 20, 2012 continued its policy statement that the low rate action is in response to “risk to growth.” Federal Reserve Chairman Bernanke has announced he intends to keep rates at these levels through the end of calendar year 2014. The chart below shows the interest rates for U. S. Treasury issues for the month ending June 2012:

Source: Bloomberg Financial Systems

The U.S. economy continues to show slow incremental growth. One economic indicator we monitor is the national unemployment rate, which tends to show the overall health of the national economy. For the month of June 2012,

the national unemployment rate was reported at 8.2%, up 0.1% from the April 2012 level of 8.1%; however, this increase is still significantly below the annual average rate of 9.0% for the past twelve months.

The unemployment rate is considered a “lagging” economic indicator and does not reflect immediate or current financial and economic events. The unemployment rate does indicate the level of idle workers as a percentage of the overall labor force. The chart below shows the national unemployment rate for the past twelve months:

Source: Bureau of Statistics, Dept of Labor

What is more troubling is the slowdown in job creation. The Bureau of Labor Statistics publishes monthly the value of US Employees on nonfarm payrolls, which is an indication of how the corporate or business sector is hiring. For the month of June 2012, the nonfarm payroll number was reported to be only 80,000 new jobs created. This is a slight increase from May’s value of 77,000 and April’s value of 68,000 nonfarm payrolls and significantly below the value economists have cited of 150,000 monthly nonfarm jobs created to sustain our economic recovery. The past three month’s values are levels of concern if they indicate a forward trend. With the graduation of students from high school and colleges in June 2012, there appears to be a small number of employment opportunities for the graduating classes. The chart below shows the nonfarm payroll values for the past two years:

Source: U.S. Bureau of Labor Statistics

For the month of June 2012, another economic factor we watch is the monthly Retail Sales (less Autos), which measures the level of consumer spending and provides an indication of the underlying vitality of the overall national economy. The June 2012 retail sales data released by the Census Department showed a value of \$328.5 billion, down from May 2012 value of \$330.5 billion. For the past three months, the national retail sales number has shown a decline of 1.4% from a high of \$333.2 billion in March 2012. This trend combined with the absence of job creation is contributing to a slowdown in the economic activity as consumers are becoming more cautious of the future vitality of the economy. The chart below shows the monthly increase in consumer spending for the past twenty four months.

Source: Census Bureau, US Government

Supporting the growth in retail sales for the past months, we see the annualized rate of auto sales showing sustained sales volume, however, the past three months have shown a slight decline in sales. This economic statistic is cyclical and driven by a combination of consumer confidence, the price of gasoline and the overall health of the economy. Financial institutions report a robust volume increase in auto leasing, with the low interest rates an extra incentive. The chart below shows the monthly annualized auto sales for the past twenty four months:

Source: Bloomberg Financial System

The City’s investment portfolio remains strongly diversified and invested in high credit quality issues of U.S. Treasuries, Federal Agencies, Medium Term Corporate Notes and high grade commercial paper. Investments in money market accounts are restricted to U.S. Treasury and Federal Agencies only and a review of the State of California Local Agency Investment Fund (LAIF) shows high levels of liquidity and safe investments. The City’s investment strategy continues to focus on safety and providing liquidity for the City’s operational requirements.

INVESTMENT PERFORMANCE/

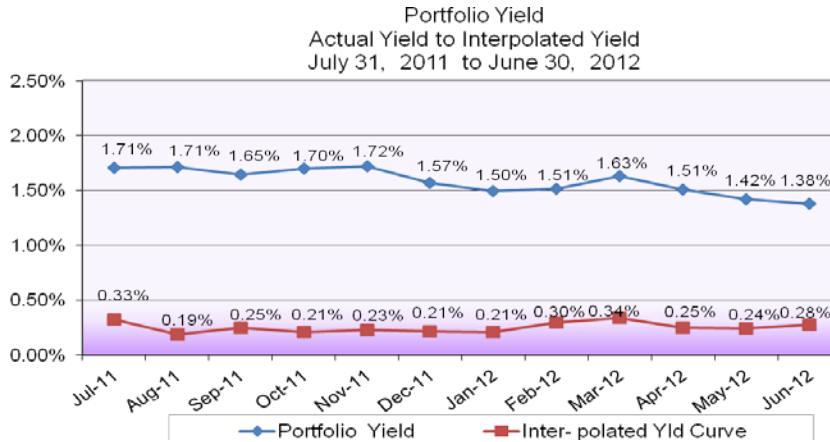

For June 30, 2012, the City Treasurer’s Investment Portfolio performance was:

	Amount of Funds (Market Value)	Maturity	Effective Yield	Interpolated Yield	Total Return Monthly	Total Return Annual
Short-Term Portfolio	\$ 161,711,522	14 days	0.23 %	0.03 %	0.020	0.228
Long-Term Portfolio	\$ 259,031,847	2.1 years	2.11 %	0.33 %	0.195	2.316
Total Portfolio	\$ 420,743,369	1.3 years	1.38 %	0.28 %	0.131	1.694

The portfolio balance includes a deposit, as of June 30, 2012 of \$68,371,530 for acquisition funds from the 2011A Electric Bonds. As a “AA” credit rated portfolio, we are recognized as a permitted investment by the bond indenture of the above bonds. These funds enjoy the advantage of superior market rates of return in a historically low interest rate environment.

Please note the use of interpolated yield values and total return values are guidelines and not used in the performance evaluation of the portfolio. The investment of public funds is exposed to a large range of variable factors, such as increases or decreases in revenues and expenditures as well as seasonal timing, which can affect the cash flow of the City.

The City’s investment portfolio continues to provide above market rates of return on funds invested as shown in the following graph which shows the City’s net overall performance to a market indicator for the past twelve months:

Source: Treasurer’s Office, Anaheim

A complete listing of the portfolio holdings and investment activity for the City of Anaheim’s Investment Portfolio for the month of June 2012 is on the following pages.

IMPACT ON BUDGET:

There is no impact on the General Fund.

Respectfully submitted,

Henry W. Stern, CTP
 City Treasurer

FUND PROFILE

July 29, 2011

City of Anaheim Treasurer Investment Pool

Fund Credit Quality Ratings Definitions

AAAF The fund's portfolio holdings provide extremely strong protection against losses from credit defaults.

AAF The fund's portfolio holdings provide very strong protection against losses from credit defaults.

A The fund's portfolio holdings provide strong protection against losses from credit defaults.

BBB The fund's portfolio holdings provide adequate protection against losses from credit defaults.

BB The fund's portfolio holdings provide uncertain protection against losses from credit defaults.

B The fund's portfolio holdings exhibit vulnerability to losses from credit defaults.

CCC The fund's portfolio holdings make it extremely vulnerable to losses from credit defaults.

Plus (+) or Minus (-) The ratings from 'AA' to 'CCC' may be modified to show relative standing within the major rating categories.

Fund Credit quality ratings, identified by the 'F' subscript, are assigned to bond funds and other actively managed funds that exhibit variable net asset values. These ratings are current assessments of the overall credit quality of a fund's portfolio. The ratings reflect the level of protection against losses from credit defaults and are based on an analysis of the credit quality of the portfolio investments and the likelihood of counterparty defaults.

About the Fund

Fund Rating	AAf / S1
Fund Type	Variable NAV Government Investment Pool
Investment Adviser	City of Anaheim CA
Portfolio Manager	Henry Stern
Fund Rated Since	July 2008

Portfolio Composition as of July 29, 2011

AGCY - Agency Fixed Rate; MMF - Money Market Fund; BOND - Corporate Fixed Rate; DCP - Commercial Paper

*As assessed by Standard & Poor's

Fund Highlights

- Average maturity 2 years or less
- The portfolio must purchase securities with a rating of A or better

Management

The Treasurer for the city of Anaheim, CA is responsible for overall management of the portfolio. The Treasurer has prior experience managing S&P rated government investment pools during his tenure at the cities of Los Angeles and Long Beach. The city of Anaheim's \$300+ million portfolio is divided into a short term and a long term portfolios, where \$95-\$120 million comprises the shorter-term component. The investment policy is reviewed and submitted to the City Council annually, with the current 2011 policy in effect, applies to all cash and investments controlled by the Anaheim Treasurer on behalf of the City.

Credit Quality

The 'AAf' fund credit quality rating is based on our analysis of the credit quality of the Portfolio's eligible investments, the counterparties, and overall management by the portfolio's investment managers. The 'AAf' rating signifies that the portfolio holdings provide very strong protection against losses from credit defaults. The 'S1' volatility rating signifies that a fund possesses low sensitivity to changing market conditions and a level of risk that is less than or equal to that of a portfolio comprised of the highest quality fixed-income instruments with an average maturity of one to three years. As part of our volatility analysis, we assessed the management, portfolio-level risk, target durations, and comparable return strategies of the Portfolio.

Portfolio Assets

Eligible portfolio holdings are typically comprised of highly rated securities, including money-market

funds, investment-grade corporate debt, CP, the Local Agency Investment Fund (LAIF), U.S. Treasury and Agency securities. The portfolio has to purchase securities with a rating of A or better. The Anaheim Treasurer's Investment Pool's primary objective is to provide safety of principal followed by maintenance of liquidity and return on investment. The various city departments are the Investment Pool's predominant investors. The short-term portfolio's benchmark is the ninety-one day T-bill and it is managed with the view that cash is needed for operating purposes within a 6-month period. The long-term portfolio uses the ML 1-3 Year US Treasury benchmark. The Investment Pool's overall duration is currently 1.5 years with a maximum duration of 3 years. Union Bank of CA is the custodian for the pool.

Standard & Poor's Analyst: Guyna Johnson - (1) 312-233-7008
