

MWD Hydro- electric Project

The Cities of Anaheim, Azusa, and Colton have contracted with The Metropolitan Water District of Southern California, through Southern California Public Power Authority for 17.1 MW of intermittent renewable hydro electricity from four conduit hydroelectric plants located in the Los Angeles Basin. The City is entitled to 56.5% of the project's output, or 9.7 MW from all four plants: Coyote Creek, Perris, Rio Hondo, and Valley View in La Habra, Perris, South Gate and Yorba Linda, respectively.

Transmission is provided by the California Independent System Operator. The 15 year and 2 month contract expires on December 31, 2023.

STATISTICS

- Location: **Southern CA**
- Type: **Conduit Hydroelectric**
- Term Started: **November 2008**
- Contract Capacity: **17.1 MW**
- Term: **15 Years 2 Months**
- Term Ends: **December 2023**

ANAHEIM'S SHARE

- 56.5% | 9.7 MW

GENERATION PROFILE

- Intermittent
(Subject to Water Availability)
