Recommended Acceptable Fire Resistive Plant Species

PURPOSE

To provide a list of trees and plants for homes that are fire resistive when combined with plant arrangement, installation and maintenance that do not easily transmit fire between each other or to the home.

GENERAL INFORMATION

This plant list was created by various State of California Agencies. Although the plant list was designed specifically for landscape fuel modification zones, the species identified on the list are also a good choice for ornamental vegetation for use around your home in areas subjected to the effects of wildfires.

Fire resistance could also be maintained or improved through appropriate irrigation frequencies. The best plant forms to reduce the effects of wildfire are succulents such as Aloe, Agave, and Cactus along with others such as Yucca or other low growing ground covers from the approved plant list.

FIRE-RESISTANT LANDSCAPING

A fire-safe landscape isn't necessarily the same thing as a well-maintained yard. A fire-safe landscape uses fire-resistant plants that are strategically planted to resist the spread of fire to your home. Fire resistant plants are great in California because they are often drought tolerant as well.

Planting for Fire Safety Through proper plant selection, placement, and maintenance, we can diminish the possibility of ignition, lower fire intensity, and reduce how quickly a fire spreads, all of which increase a home's survivability. In firescaping, plant selection is primarily determined by a plant's ability to reduce the wildfire threat. Other considerations may be important such as appearance, ability to hold the soil in place, and wildlife habitat value. Avoid evergreens near the house. The traditional foundation planting of junipers is not a viable solution in a firescape design. Minimize use of evergreen shrubs and trees within 30 feet of a structure, because junipers, other conifers, and broadleaf evergreens contain oils, resins, and waxes that make these plants burn with great intensity. Use ornamental grasses and berries sparingly because they also can be highly flammable. Choose "fire smart" plants. These are plants with a high moisture content. They are low growing. Their stems and leaves are not resinous, oily, or waxy. Deciduous trees are generally more fire resistant than evergreens because they have a higher moisture content when in leaf, a lower fuel volume when dormant, and typically do not contain flammable oils. Choose "fire smart" plants Placement and maintenance of trees and shrubs is as important as actual plant selection. When planning tree placement in the landscape, remember the tree's size at maturity. Keep tree limbs at least 15 feet from chimneys, power lines, and structures. Specimen trees can be used near a structure if pruned properly and well irrigated.

Recommended Acceptable Fire Resistive Plant Species

PLANT SPECIES RECOMMENDED FOR WILDFIRE IN HIGH FIRE POTENTIAL AREAS

BOTANICAL NAME	COMMON NAME	PLANT FORM
Acer macrophyllum	Big Leaf Maple	Tree
Alnus cordata	Italian Alder	Tree
Alnus rhombifolia	White Alder	Tree
Arbutus unedo	Strawberry Tree	Tree
Ceratonia siliqua	Carob	Tree
Citrus species	Citrus	Tree
Eriobotrya japonica	Loquat	Tree
Erythrina species	Coral Tree	Tree
Ginkgo biloba	Maidenhair Tree	Tree
Juglans californica	California Black Walnut	Tree
Lagerstroemia indica	Crape Myrtle	Tree
Lagunaria patersonii	Primrose Tree	Tree
Liquidambar styraciflua	American Sweet Gum	Tree
Liriodendron tulipifera	Tulip Tree	Tree
Lyonothamnus floribundus ssp. Asplenifolius	Fernleaf Ironwood	Tree
Macadamia integrifolia	Macadamia Nut	Tree
Maytenus boaria	Mayten Tree	Tree
Metrosideros excelsus	New Zealand Christmas Tree	Tree
Parkinsonia aculeata	Mexican Palo Verde	Tree
Pistacia chinensis	Chinese Pistache	Tree
Pittosporum undulatum	Victorian Box	Tree
Plantanus racemosa	California Sycamore	Tree

Recommended Acceptable Fire Resistive Plant Species

PLANT SPECIES RECOMMENDED FOR WILDFIRE IN HIGH FIRE POTENTIAL AREAS

BOTANICAL NAME	COMMON NAME	PLANT FORM
Populus fremontii	Western Cottonwood	Tree
Quercus agrifolia	Coast Live Oak	Tree
Quercus engelmannii	Engelmann Oak	Tree
Quercus suber	Cork Oak	Tree
Rhus lancea	African Sumac	Tree
Sambucus mexicana	Mexican Elderberry	Tree
Stenocarpus sinuatus	Firewheel Tree	Tree
Umbellularia californica	California Laurel	Tree
Abelia x grandiflora	Glossy Abelia	Shrub
Acacia redolens desert carpet	Desert Carpet	Shrub
Achillea millefolium	Common Yarrow	Low Shrub
Achillea tomentosa	Woolly Yarrow	Low Shrub
Aloe arborescens	Tree Aloe	Shrub
Alogyne huegeii	Blue Hibiscus	Shrub
Amorpha fruticosa	Western False Indigobush	Shrub
Arctostaphylos glandulosa ssp.	Eastwood Manzanita	Shrub
Arctostaphylos hookeri 'Monterey Carpet'	Monterey Carpet Manzanita	Low Shrub
Arctostaphylos pungens	no common name	Shrub
Arctostaphylos refugioensis	Refugio Manzanita	Shrub
Arctostaphylos x 'Greensphere'	Greensphere Manzanita	Shrub
Atriplex canescens	Four-Wing Saltbush	Shrub
Atriplex lentiformis ssp. breweri	Brewer Saltbush	Shrub

Recommended Acceptable Fire Resistive Plant Species

UNDESIRABLE and INVASIVE PLANT SPECIES

Certain plants are considered to be undesirable and invasive due to their characteristics. These characteristics can be either physical or chemical. Physical properties that would contribute to high flammability include large amounts of dead material retained within the plant, rough or peeling bark, and the production of copious amounts of litter. Chemical properties include the presence of volatile substances such as oils, resins, wax, and pitch. Certain native plants are notorious for containing these volatile substances.

Plants with these characteristics shall not be planted in any fuel modification zones. Should these species already exist within these areas, it is recommended that they be removed because of their invasiveness or potential threat they pose to any structures.

PLANT SPECIES NOT RECOMMENDED FOR WILDFIRE IN HIGH FIRE POTENTIAL AREAS

Botanical Name	Common Name
Adenostoma Fasciculatum	Chamise
Adenostoma Sparsifolium	Red Shanks
Anthemix Cotula	Mayweed
Arecaceae (all palm species)	Palms
Artemisia Californica	California Sagebrush
Brassica Nigra	Black Mustard
Brassica Rapa	Wild Turnip, Yellow Mustard, Field Mustard
Cardaria Draba	Noary Cress, Perennial Peppergrass
Cirsium Vulgare	Wild Artichoke
Conyza Canadensis	Horseweed
Cortaderia	Pampas Grass
Cortaderia Selloana	Pampas Grass
Cupressus sp	Cypress
Cynara Cardunculus	Artichoke Thistle
Eriogonum Fasciculatum	Common Buckwheat
Eucalyptus sp	Eucalyptus
Heterothaca Grandiflora	Telegraph Plant
Juniperus sp	Juniper
Lactuca Serriola	Prickly Lettuce

Anaheim Fire & Rescue
